1. Company Overview & History

Founded in **2008** and headquartered in **Sharjah, United Arab Emirates**, Rukn Al Mukaram Trading LLC SP is a specialized bulk B2B supplier and exporter of heavy equipment spare parts, electrical infrastructure, cables, steel poles, and construction materials.

For over **18 years**, the company has operated at the intersection of technical engineering excellence and global logistics reliability — serving large-scale utility boards, mining operations, commercial developments, and infrastructure projects across **20+ African markets** and the **GCC region**.

The company's strategic location in the UAE — one of the world's most connected commercial and maritime hubs — enables streamlined multi-national supply chains with direct access to Jebel Ali Port, Khalid Port, and Hamriyah Port. From this base, Rukn Al Mukaram manages end-to-end export operations including consolidation, customs documentation, maritime shipping, and destination-side coordination across the African continent.

Key Statistics

Metric	Detail
Year Established	2008
Years of Trade	18+ Years
African Markets Served	20+ Countries
Parts Quality Standard	100% Technically Vetted

Metric	Detail
Headquarters	Sharjah, United Arab Emirates

Mission

"To bridge the critical gaps in the international industrial supply chain by delivering certified, high-demand components precisely when and where they are required."

Vision

"To become the premier single-source global trade partner recognized across Africa and the Middle East for technical integrity and flawless cross-border distribution."

2. Core Values & Technical Integrity

At Rukn Al Mukaram, we believe that real supply chain integrity is not just about finding the product — it is about getting it safely to the job site, on time, every time. Our operations are built on three foundational principles:

Technical Integrity

Every part number, voltage parameter, and material specification is vetted by our in-house engineering desk before dispatch. We do not ship unverified products. Each spare part is cross-referenced against the machine's Serial Number (Product Identification Number) to ensure exact compatibility. All aftermarket components are sourced exclusively from ISO 9001-certified manufacturers and tested for the high-heat, high-dust field conditions typical of African mining and infrastructure sites.

On-Time, Every Time

Eighteen years of customs and maritime expertise ensures that container schedules to African ports are met. Our logistics team maintains rigid internal tracking with ETA updates from the moment a container leaves the UAE port until it arrives at the destination facility. We specialize in handling the remote, the high-demand, and the logistically complex regions of Africa.

Africa-Focused Network

We have built specialized supply pipelines into South Africa, Comoros, Kenya, Tanzania, Nigeria, Ghana, Zambia, and beyond. Our team understands the unique customs requirements, port procedures, and inland transportation challenges of each market we serve — from Durban to Mombasa, Lagos to Dar es Salaam.

Core Values Summary

- **Engineering-Grade Sourcing** — Parts matched to machine serial numbers, verified before procurement
 - **ISO-Certified Supply Chain** — Aftermarket components sourced exclusively from ISO 9001-certified manufacturers
 - **Logistical Compliance** — Full adherence to international maritime regulations and customs documentation standards
 - **Pre-Shipment Inspection** — Photo confirmation and quality checks prior to container loading
 - **Response Guarantee** — Our UAE desk replies within one business day with pricing, lead times, and FCL options
-

3. Key Supply Divisions

Rukn Al Mukaram operates six integrated supply divisions, each managed by specialists with deep technical knowledge of their respective product categories. This multi-division structure allows clients to consolidate procurement across multiple project needs into a single, coordinated shipment.

Division 1: Heavy Equipment Spare Parts

Genuine CAT® & Premium Aftermarket — Engineered for Uptime

We are a bulk supplier of genuine Caterpillar (CAT®) and premium aftermarket heavy equipment spare parts, exported primarily to Africa and GCC markets. Our dual-tier parts strategy allows clients to choose between maximum OEM longevity and cost-efficient premium alternatives — both matched precisely to machine serial number.

Dual-Tier Parts Strategy

Tier	Type	Description	Best For
1	Genuine CAT® & OEM	Maximum longevity and perfect system integration	New fleets, critical overhauls, zero-downtime operations
2	Premium Aftermarket	High-quality, cost-efficient alternatives meeting or exceeding industry standards	Older equipment, moderate use, budget optimization

Product Categories

Engine Components & Rebuild Kits In-Frame and Out-of-Frame overhaul kits for CAT 3406, C15, C18, 3512, and more. Includes pistons, liners, rings, bearings, crankshafts, camshafts, cylinder heads, and full gasket sets.

Power Systems & Generator Spares Fuel injectors, injection pumps, turbochargers, water pumps, thermostats, radiator cores, aftercoolers, alternators, 24V starter motors, and ECM control modules.

Filtration & Fluids Primary and secondary fuel filters, high-efficiency oil filters, air elements, and fuel-water separators — engineered for high-heat, high-dust African mining sites.

Hydraulics & Drivetrain High-pressure hydraulic pumps, control valves, cylinders, final drives, and seal kits manufactured to OEM tolerances.

Undercarriage Assemblies Track chains, rollers, idlers, sprockets, and shoes for dozers and excavators operating in heavy mining duty.

Multi-Brand Support

Parts are also available for **Volvo**, **Hino**, and **Nissan** heavy equipment — both OEM and aftermarket options.

Division 2: Electrical & Power Infrastructure

Substation-Grade Equipment for National Utility Grids and Industrial Projects

We supply bulk quantities of HV/MV/LV power distribution and substation equipment, exported primarily to African utility boards and industrial/mining projects.

Product Categories

Transformer Solutions

- Power Transformers: Substation-grade step-up/step-down, oil-immersed and dry-type for national utility grids
- Transformer Components: HV/LV porcelain and resin bushings, on-load tap changers (OLTC), Buchholz relays, oil level indicators, silica gel breathers, cooling fans, mineral and synthetic insulating oil

Switchgears & Control

- MV Switchgear (up to 33kV): Air-insulated (AIS) and gas-insulated (GIS) panels for primary and secondary distribution

- LV Distribution Boards: Fixed and withdrawable LV switchboards, Motor Control Centers (MCC), Power Distribution Boards (PDB)
- Control & Relay Panels: Protection, metering, and automation panels with numerical relays for substation control

Protection & Distribution

- Circuit Breakers: Vacuum (VCB), SF6, MCCBs, ACBs, miniature circuit breakers (all major industrial brands)
- Instrument Transformers: Current and Potential (CT/PT) for metering and protection
- Fuses & Surge Arresters: HV HRC fuses, dropout fuse cutouts, LV knife-blade fuses, heavy-duty metal-oxide surge arresters

Target Applications

Utility grids, industrial plants, mining operations, and substation projects — supplied in container-load quantities.

Division 3: Cables & Containment Systems

Armored Power Cables and Heavy-Duty Cable Management — IEC & BS Certified

MV / HV Armored Cables (3.3kV – 33kV)

Specification	Detail
Voltage Ratings	3.3kV, 6.6kV, 11kV, 22kV, 33kV (single-core and multi-core)
Conductors	Copper and Aluminum
Insulation	XLPE/PVC
Armoring	SWA (Steel Wire Armored) / AWA (Aluminum Wire Armored)
Standards	IEC 60502 and BS 6622 — certified for harsh African industrial environments

Cable Trays, Ladders & Accessories

Containment System	Material Options	Typical Application
Perforated Cable Trays	Hot-Dip Galvanized Steel, Pre-Galv, SS304	Power and control cable routing in plants
Heavy-Duty Cable Ladders	Hot-Dip Galvanized Steel, SS316	High-mass MV power cables in industrial zones
Solid Bottom Trunking	Pre-Galvanized Steel, Powder-Coated	Low-voltage control wiring in commercial buildings
Cable Glands & Lugs	Brass, Tinned Copper	Termination of armored cables at switchgear and motors

Bulk Quote Parameters

Clients simply provide four parameters for a complete quote:

1. Material Type — Copper or Aluminum conductor
 2. Core Count & Size — e.g., 3-Core × 185 mm² or 4-Core × 25 mm²
 3. Voltage & Armor — e.g., 11kV SWA or 600/1000V SWA
 4. Linear Volume — Total meters or drum counts required
-

Division 4: Steel Poles & Lighting

Utility and Lighting Structures for Infrastructure Projects

We supply hot-dip galvanized steel poles, octagonal and tubular masts, and smart street lighting systems for utility distribution, highway lighting, and industrial site illumination.

Product Range

- **Utility Poles** — Hot-dip galvanized steel poles for power distribution and transmission lines
- **Octagonal & Tubular Masts** — High-mast lighting for ports, industrial yards, and sports facilities
- **Street Lighting Poles** — Single and double-arm configurations for highway and urban road networks
- **Smart Street Lighting** — Integrated LED luminaires with smart control systems for municipal projects

All poles are manufactured to international standards with hot-dip galvanizing for maximum corrosion resistance in coastal and tropical environments.

Division 5: Bulk Construction Materials

FCL Supply of Structural, Architectural, and Finishing Materials

We supply container-load quantities of scaffolding, formwork, rebar, tiles, bitumen, and protective coatings for major infrastructure and commercial construction projects across Africa.

Scaffolding & Formwork

Scaffolding Systems

- Cuplock and Ringlock: Heavy-duty modular systems for high-rise construction

- **Frame Scaffolding:** Light-to-medium duty for exterior maintenance and masonry

Formwork & Support

- Adjustable steel shoring props
- Heavy-duty push-pull props
- Leveling jacks
- Right-angle, swivel, and sleeve couplers
- Premium film-faced structural plywood (rated for multiple concrete pours)

Structural & Finishing Materials

Material Class	Specifications	Project Use
Reinforcement Rebar	High-Tensile Grade 60 / B500B, 8–32 mm	Reinforced concrete columns, slabs, foundations
Porcelain & Ceramic Tiles	600×600, 800×800, 1200×600 mm — polished, matte	Commercial flooring, hotels, residential
Road & Foundation Bitumen	Penetration grade 60/70 and 80/100 — drums or bulk	Asphalt paving, road construction, waterproofing
Industrial & Protective Coatings	Anti-corrosive zinc primers, epoxy, weather acrylics	Steel protection, marine ports, building façades

Complete BOM Coverage

One source for full project material schedules:

- **Architectural Finishes:** Porcelain tiles, sanitary ware, profiles, façade systems
- **Structural Steel:** Rebar, structural sections, mesh, binding wire (FCL-ready)
- **Protective Coatings:** Industrial primers and topcoats for marine and high-exposure environments

Division 6: Logistics to Africa

UAE → Africa. On-Time, Every Time.

Eighteen years of cross-border customs compliance and maritime shipping expertise for complex bulk transport, container loading, and port delivery schedules.

Three Key Pillars

FCL Container Loading Optimized 20ft and 40ft Full Container Load planning, dunnage, lashing, and weight distribution by trained loaders.

Customs Compliance Full export documentation: commercial invoice, packing list, certificate of origin, Bill of Lading, and destination-specific certifications.

Milestone Monitoring Rigid internal tracking with ETA updates from the moment a container leaves the UAE port.

End-to-End Service Chain

- 1. **Consolidation** — Bulk picking, inspection, and FCL/LCL container loading at Sharjah facility
- 2. **Maritime** — Jebel Ali, Khalid, and Hamriyah ports → Durban, Mombasa, Lagos, Dar es Salaam
- 3. **Customs Clearance** — Destination-side coordination with vetted clearing agents
- 4. **Last-Mile** — Inland trucking to mine sites, utility yards, and project warehouses

Trade Terms

- **Incoterms:** FOB Jebel Ali / CIF Destination Port / DAP Job Site
- **Payment:** Telegraphic Transfer (TT), Letter of Credit (LC at sight)
- **Minimum Order:** 1× FCL (20ft or 40ft)

\pagebreak

4. Markets Served

Rukn Al Mukaram maintains specialized supply pipelines into key economic zones across Africa and the Middle East.

Primary Hubs

Country	Focus Areas
South Africa	Mining-grade machinery parts, utility infrastructure, civil construction
Comoros Islands	Grid expansion products, civil construction materials, heavy equipment spares

Regional Footprint

Region	Countries	Focus Areas
East Africa	Kenya, Tanzania, Uganda	Grid expansion, transformers, structural steel
Southern Africa	Zambia, Zimbabwe, Mozambique	Heavy equipment spares, bulk construction materials

Region	Countries	Focus Areas
West Africa	Nigeria, Ghana	Power distribution equipment, high-mast lighting
North Africa	Egypt, Algeria, Morocco	Infrastructure and industrial supply
Middle East — GCC	Saudi Arabia, UAE, Qatar, Kuwait, Oman, Bahrain	Construction equipment, electrical infrastructure

Port Coverage

Our logistics network covers delivery to major African and Middle Eastern ports including:

- **Durban** (South Africa)
- **Mombasa** (Kenya)
- **Dar es Salaam** (Tanzania)
- **Lagos / Apapa** (Nigeria)
- **Tema** (Ghana)
- **Moroni** (Comoros)
- **Beira** (Mozambique)
- **Jebel Ali** (UAE)

5. Why Choose Rukn Al Mukaram

The Rukn Al Mukaram Advantage

Technical Integrity — Every part number, voltage parameter, and specification is vetted by our engineering desk before dispatch. No unverified products ship from our facility.

On-Time, Every Time — 18 years of customs and maritime expertise ensures container schedules to African ports are met. We handle the remote, the high-demand, and the logistically complex.

Single-Source Consolidation — Six integrated divisions mean clients can consolidate procurement across spare parts, electrical infrastructure, cables, steel poles, construction materials, and logistics into a single coordinated shipment.

Dual-Tier Pricing Strategy — Genuine OEM and premium aftermarket options quoted side-by-side, giving clients full control over cost optimization without compromising quality.

Africa-Focused Network — Specialized supply pipelines into 20+ African markets with deep understanding of local customs procedures, port operations, and inland transportation.

Response Guarantee — Send your tender specs, BOM, or part list. Our UAE desk replies within one business day with pricing, lead times, and FCL options to your port.

6. Contact Information

Get in Touch

Send your tender specs, Bill of Materials (BOM), or part list. Our UAE engineering desk replies within one business day with pricing, lead times, and FCL shipping options to your port.

Quick Quote Channels

- **WhatsApp Quote:** Send your part numbers, BOM, or material specs directly to +971 50 870 7961
- **Email:** Forward your tender documents, material schedules, or RFQs to info@ruknaalmukaram.com
- **Call:** Speak directly with our UAE desk at +971 50 870 7961

What to Include in Your Inquiry

For the fastest and most accurate quotation, please provide:

1. **Part Numbers** — CAT part numbers or machine model + serial number (PIN)
2. **Material Specifications** — Voltage, conductor size, armor type, standard (IEC/BS)
3. **Quantities** — Unit count, linear meters, or FCL container count
4. **Destination Port** — City and country of delivery
5. **Incoterm Preference** — FOB, CIF, or DAP
